Approach of Performance Improvement

1. Practice

Systemic view

2. Principles

Value and results focus by working with partners

3. Methodology

Systematic process steps to achieve results

4. Foundation

Input-process-output feedback system

Impact of Performance Improvement

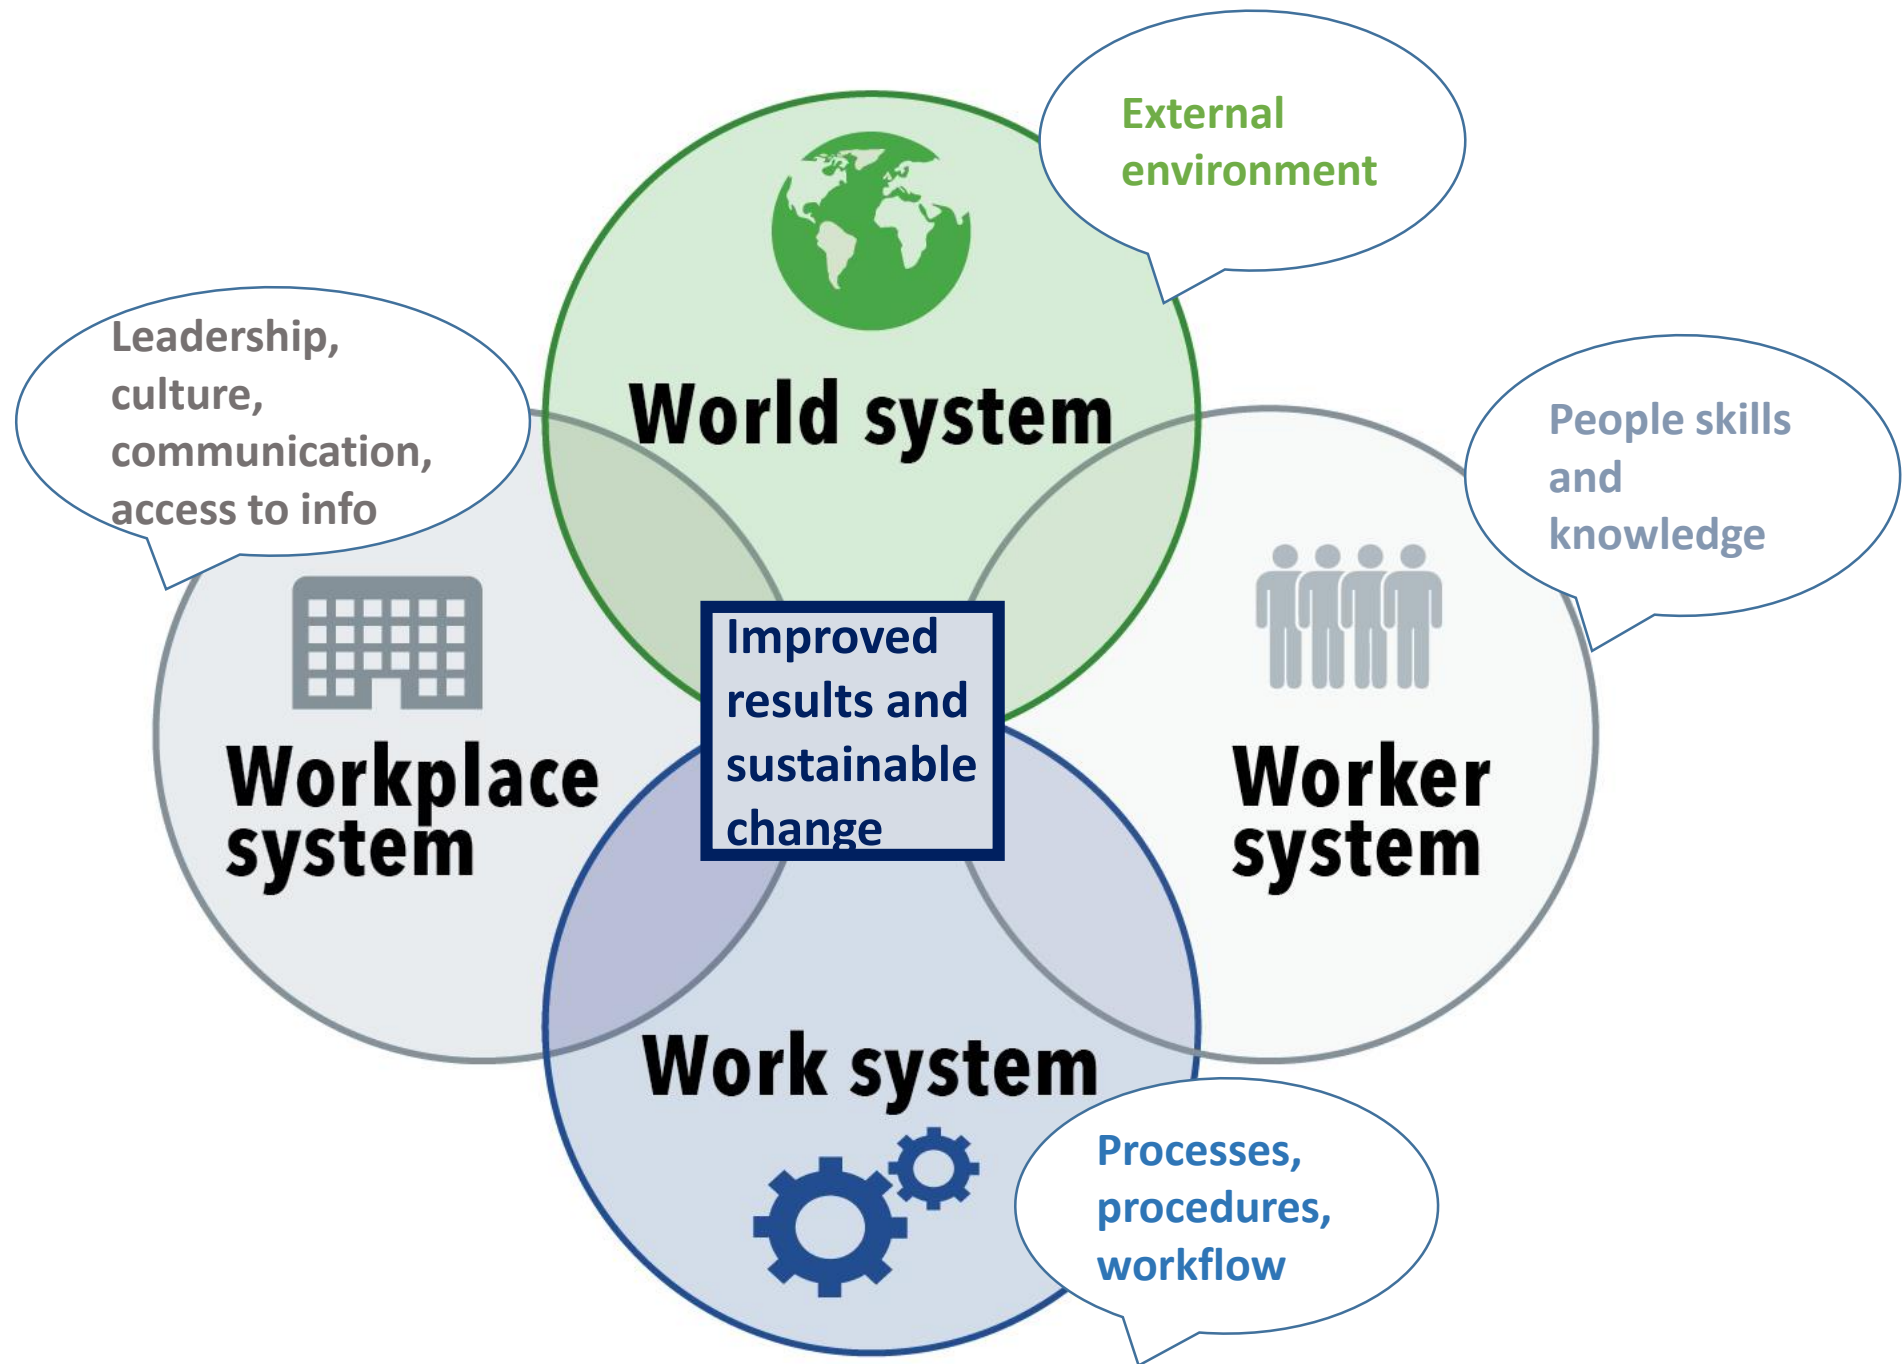

Human Performance Improvement is a value add and results focused practice providing a total systems view of performance. It identifies barriers and enablers to achieve business results by addressing the gaps at the work (operations), worker (people), workplace (organisation) and world (environment) levels affecting performance.

Value of Performance Improvement

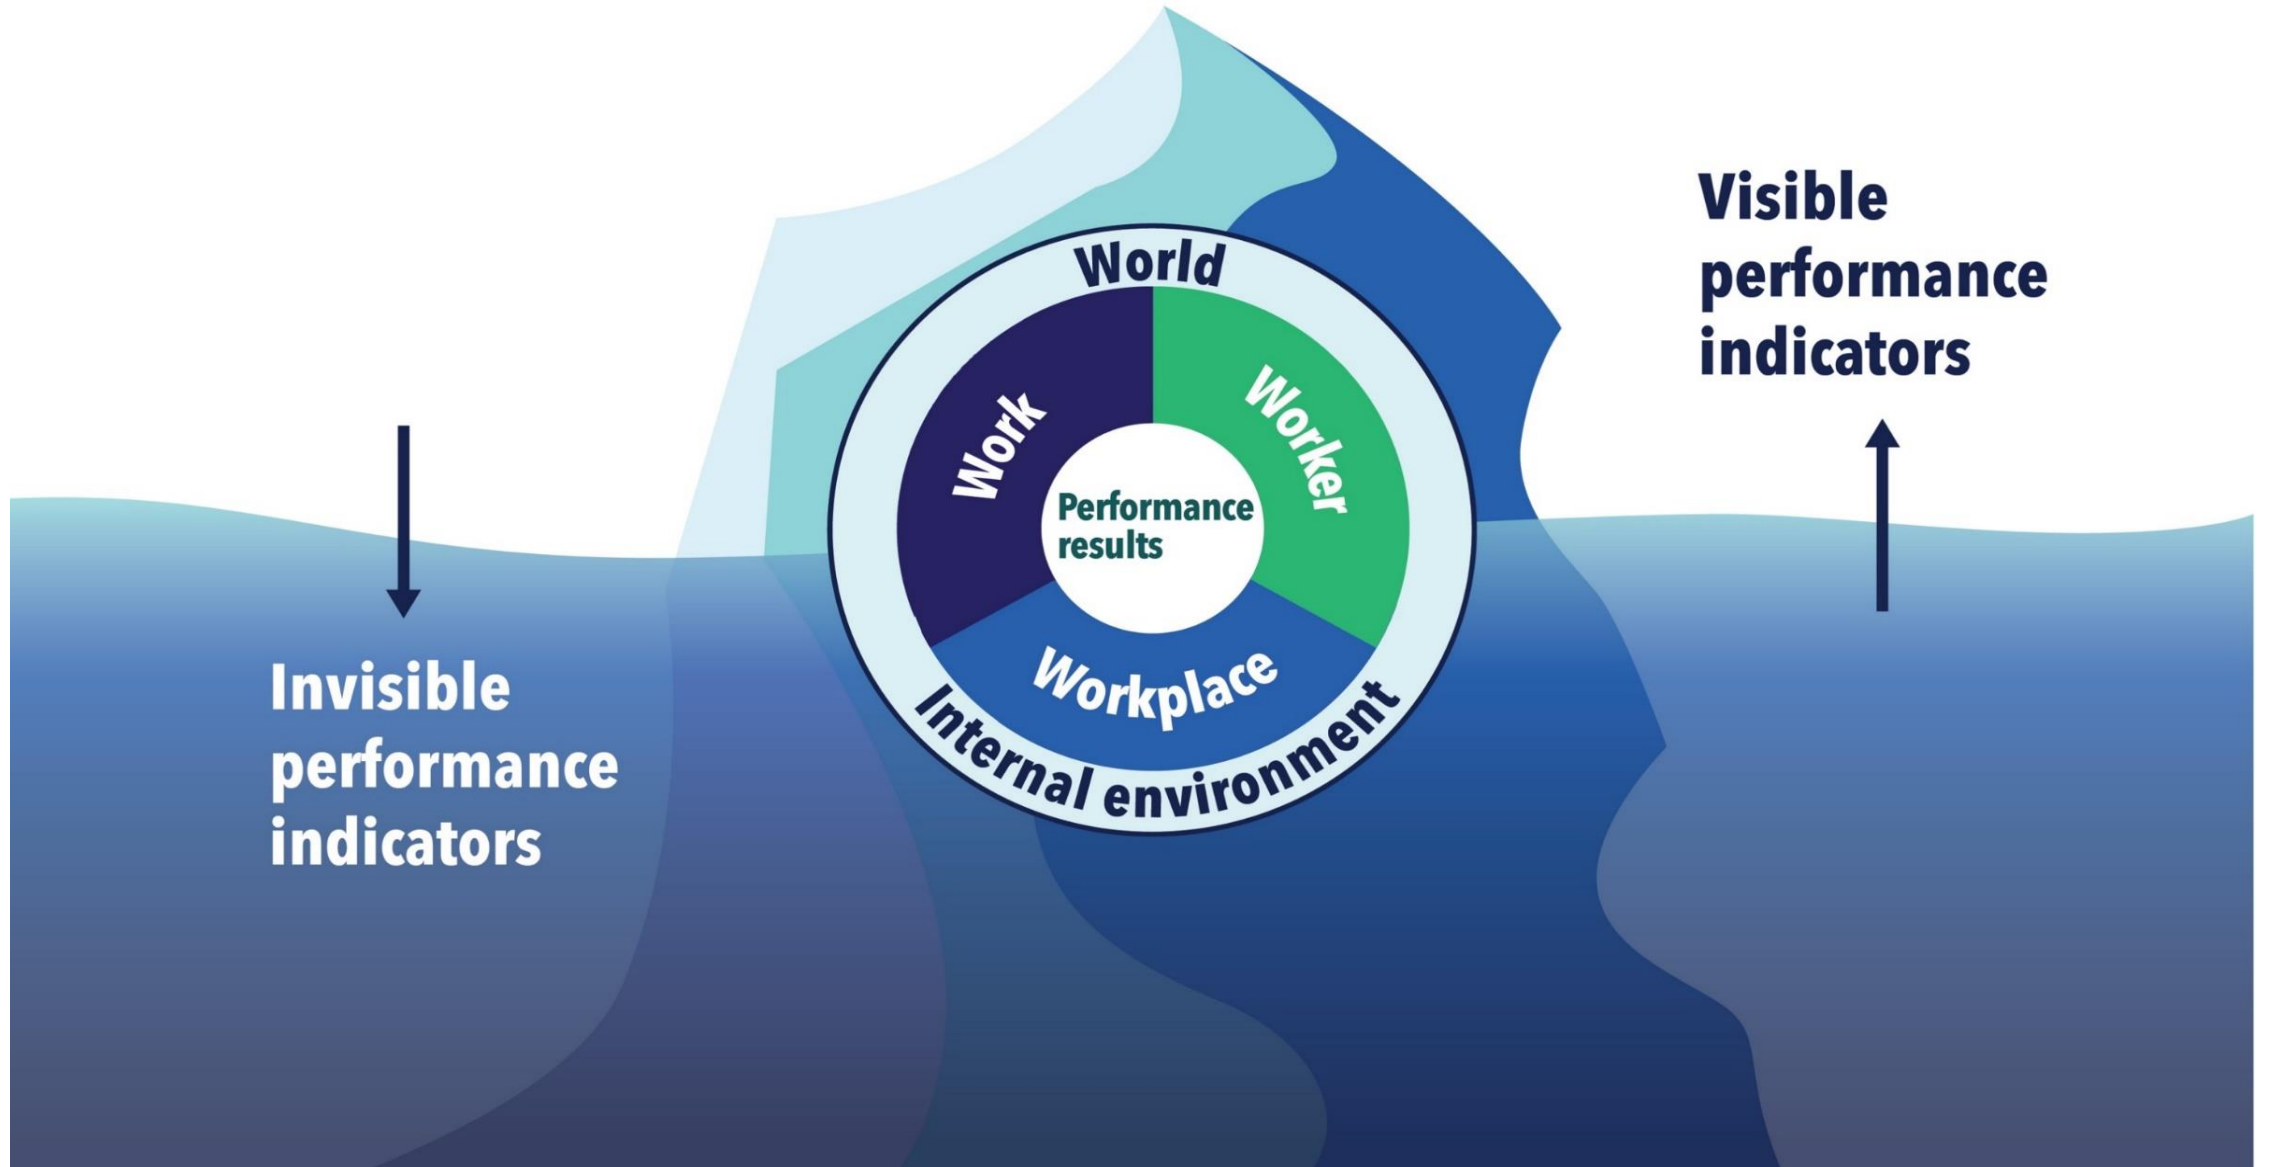

- ☐ Faster problem solving
- ☐ Efficient decision making
- ☐ Improved performance value vs activity
- ☐ Effective people and processes fit
- ☐ Improved ROI

Performance Improvement Practice - Systemic View

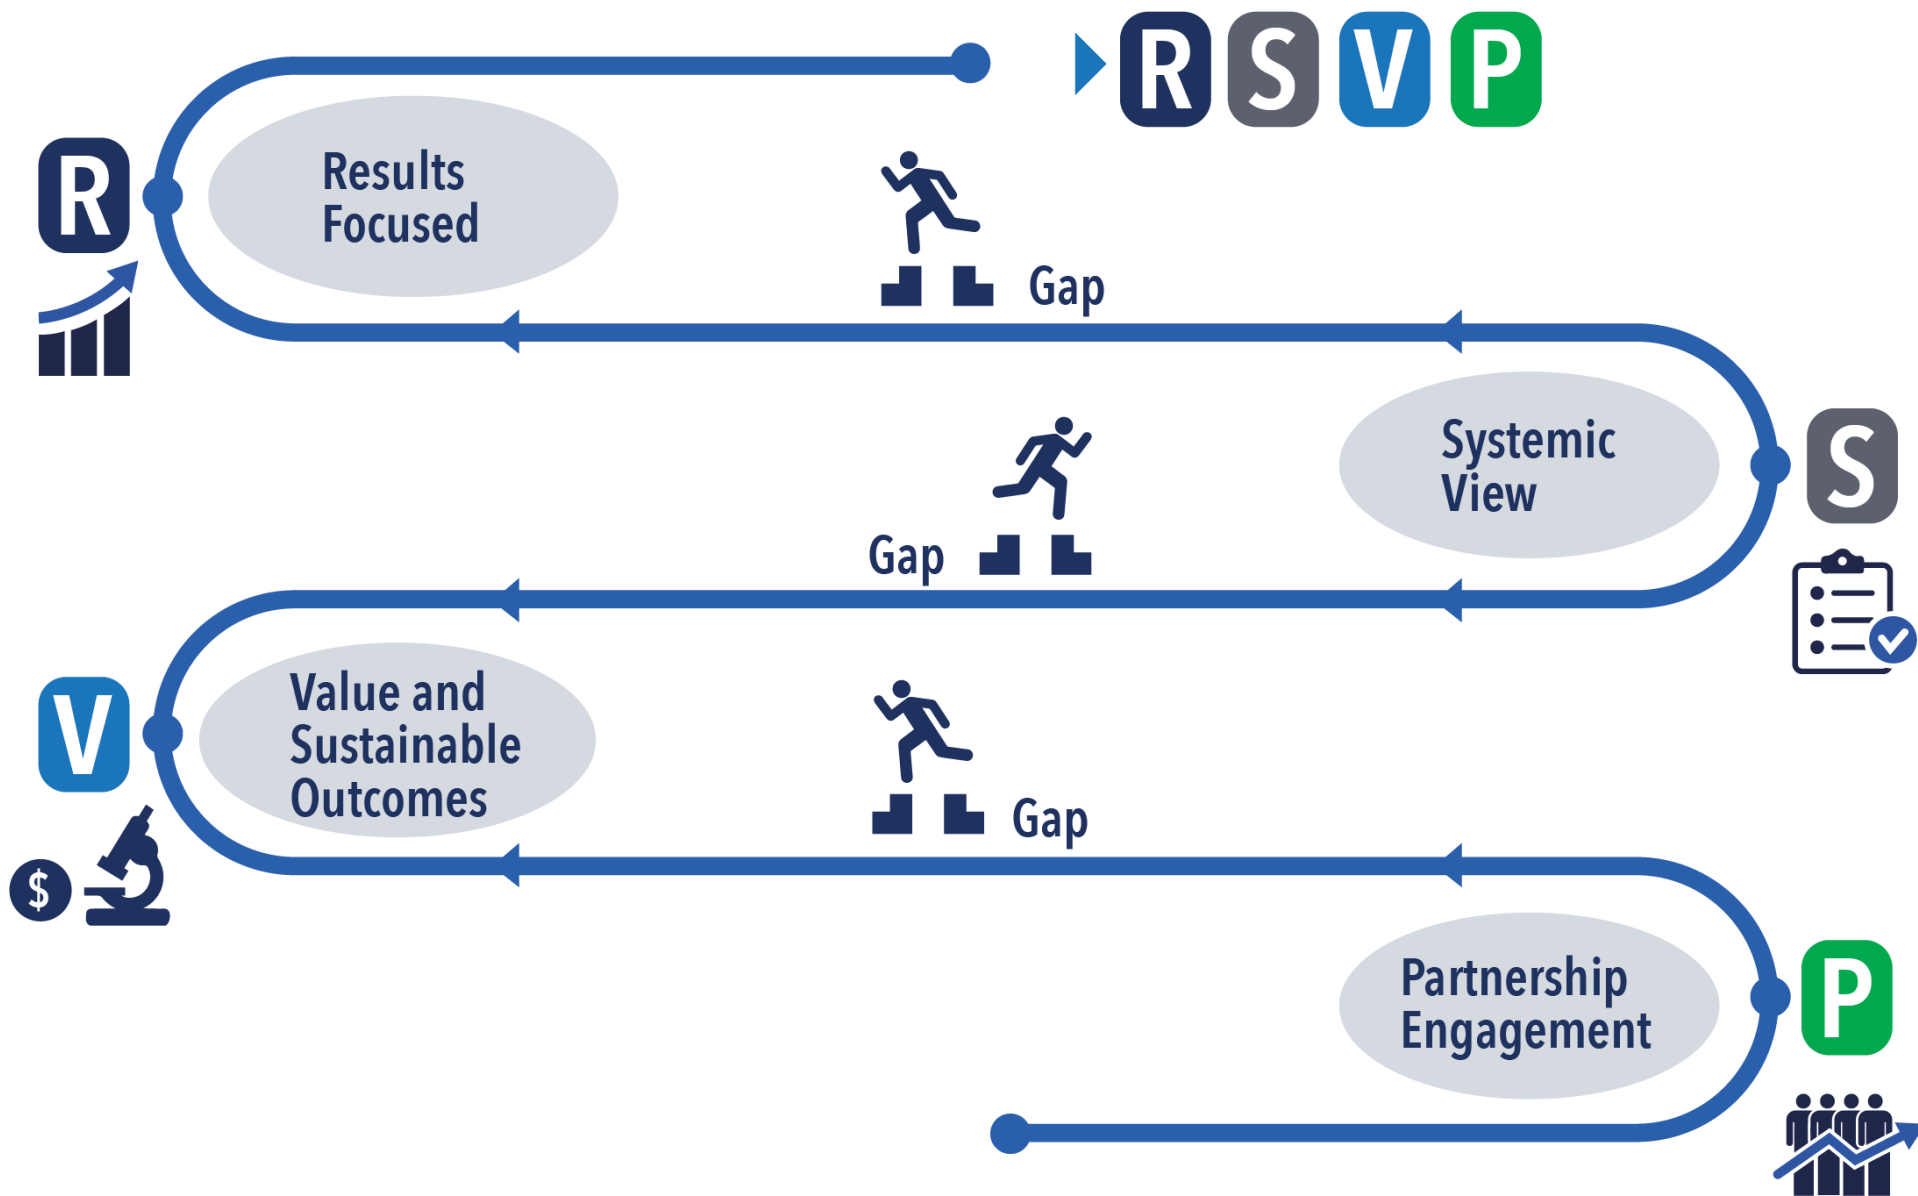

Performance Indicators – Iceberg Analogy

Performance Improvement Principles – Business Lens

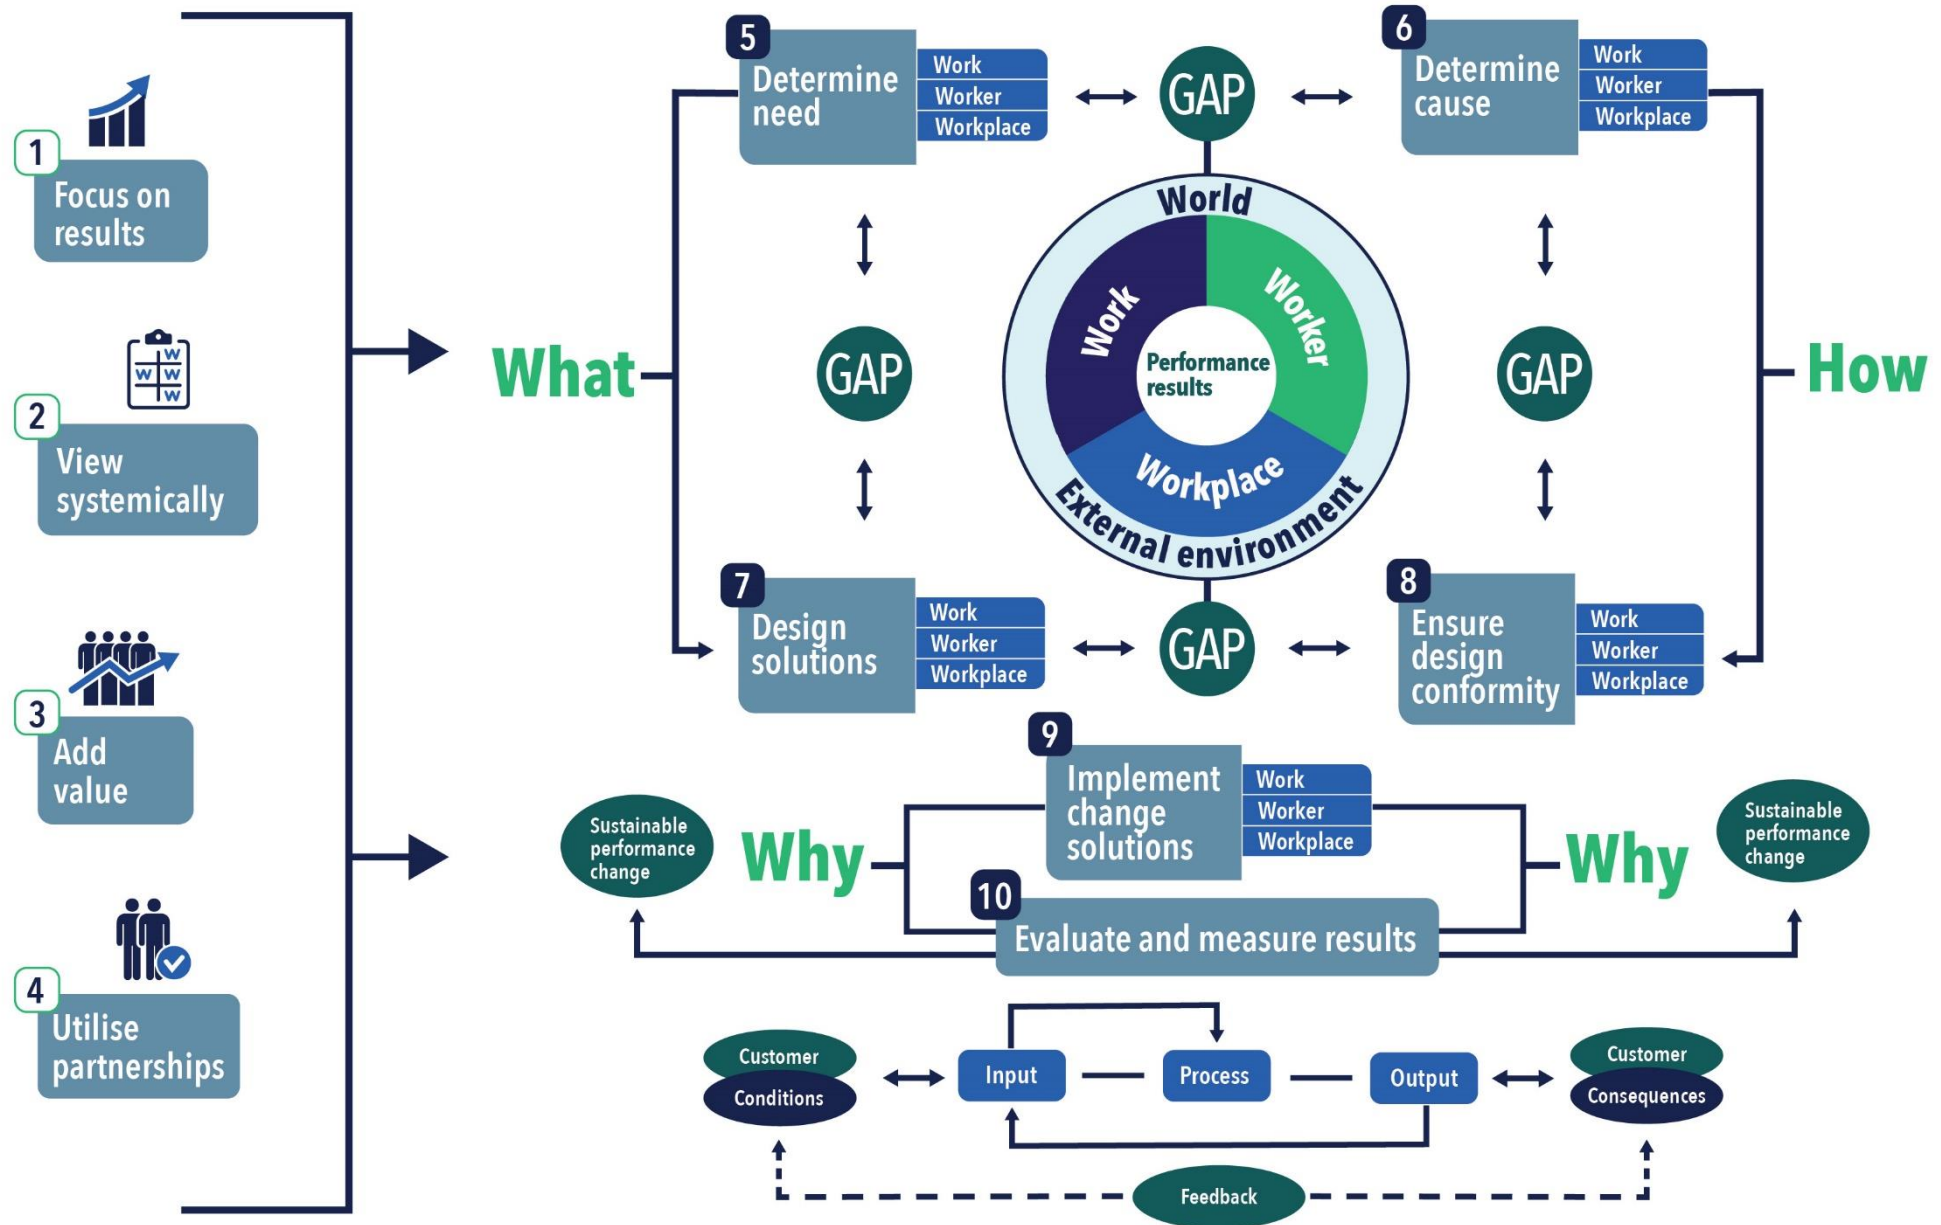

1. Focus on results
2. Add value
3. Apply a systemic view
4. Work with partners and stakeholders

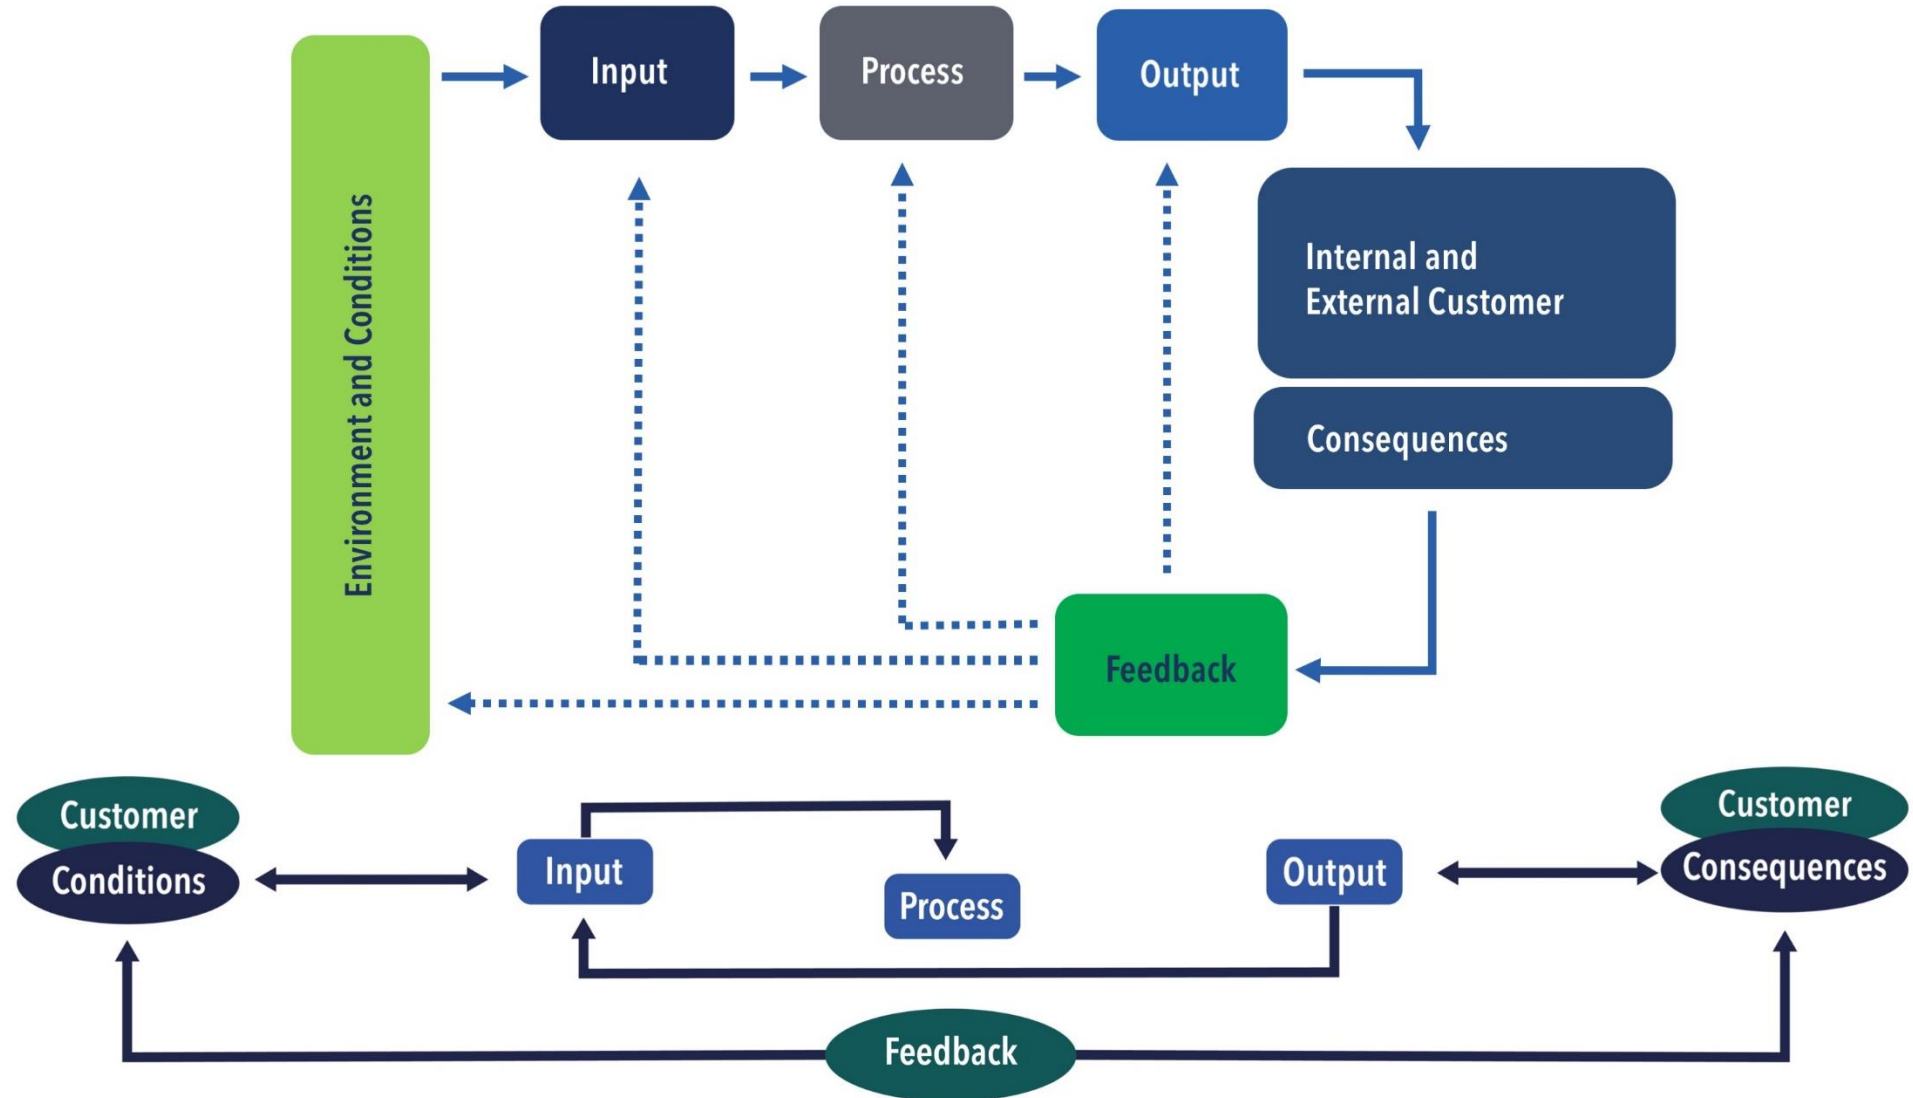

Performance Improvement Methodology Approach

1. What is the need or problem?
2. What are the barriers and drivers?
3. How will it be resolved?
4. How will conformity to quality be achieved?
5. What are the solutions to be implemented?
6. How will the results and impact be measured?

Performance Improvement Methodology

Performance Improvement Foundation

When you create a solution for a business need, the first questions to ask are:

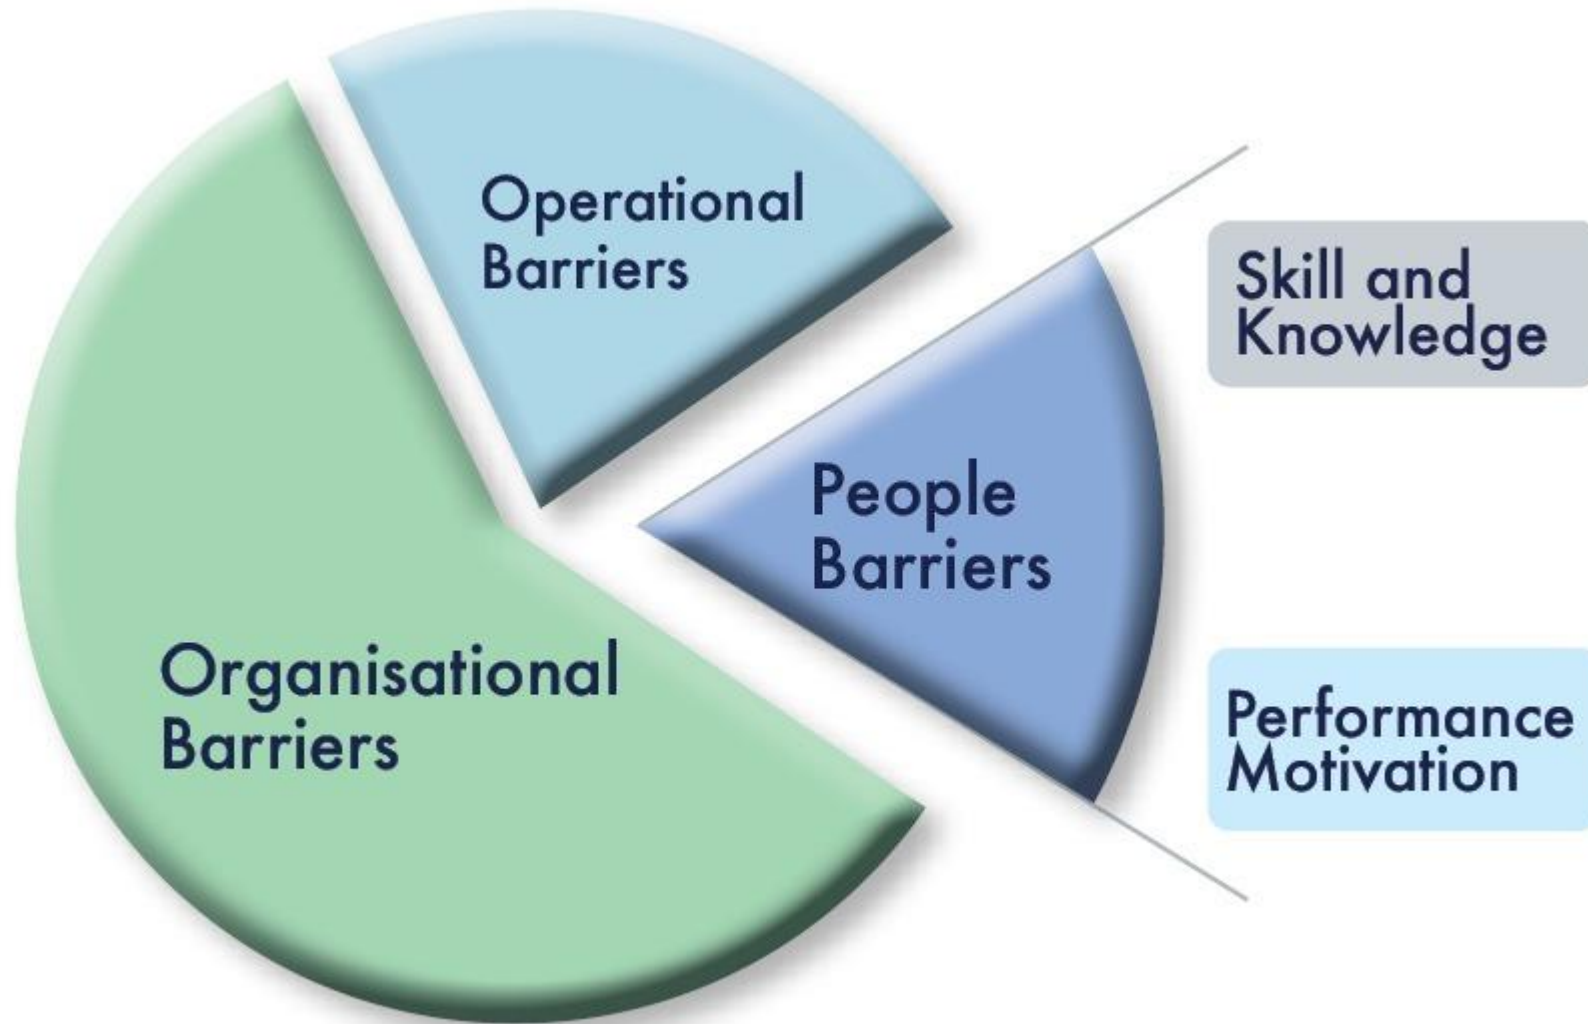

- What are the people expectations and needs behind it?
- What is the impact on people?

Performance Improvement Correcting Framework

(Identified Barriers + Facilitate Enablers) + Develop Behaviours = Sustained Performance

Performance Improvement – People Barriers

Identify barriers and Drivers

|  | Performance Planned | Performance Managed | Performance Measured | Conditions and Risks | INPUT |
|--|--------------------------------|--|----------------------------|----------------------|-------|
|  Strategic Organisational System (WORKPLACE) | Strategy Vision Values | Process and application | Governance and risk | | |
|  Tactical Operational System (WORK) | Functional and technology | Misalignment of processes and procedures | Compliance | | |
|  Technical People System (WORKER) | Capacity and workforce plan | HR technology enablement | Rewards and recognition | | |

Facilitate Enablers

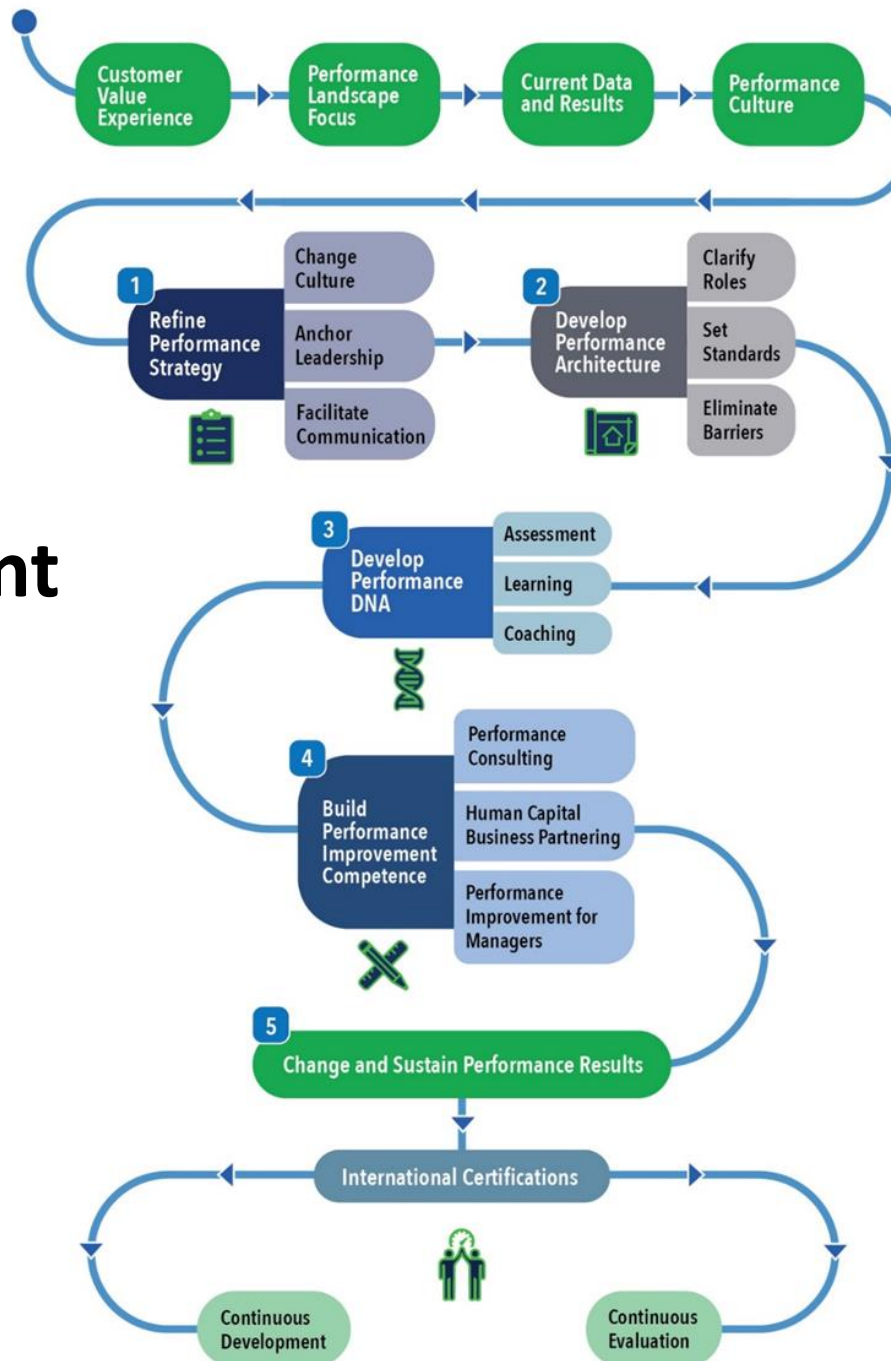

|  | Performance Planned | Performance Managed | Performance Measured | Agile and systems interconnectivity | PROCESS |
|--|----------------------------|--|--|--|---------|
|  Strategic Organisational System (WORKPLACE) | Strategic alignment | Collaborative resources and quality data | Sustainable customer focused performance change | | |
|  Tactical Operational System (WORK) | Standard and policies | Streamline performance tools simplified | Value chain alignment responsiveness | | |
|  Technical People System (WORKER) | Worker people impact | Business partnering performance mindset | Work-life and wellbeing | | |

Develop Behaviours

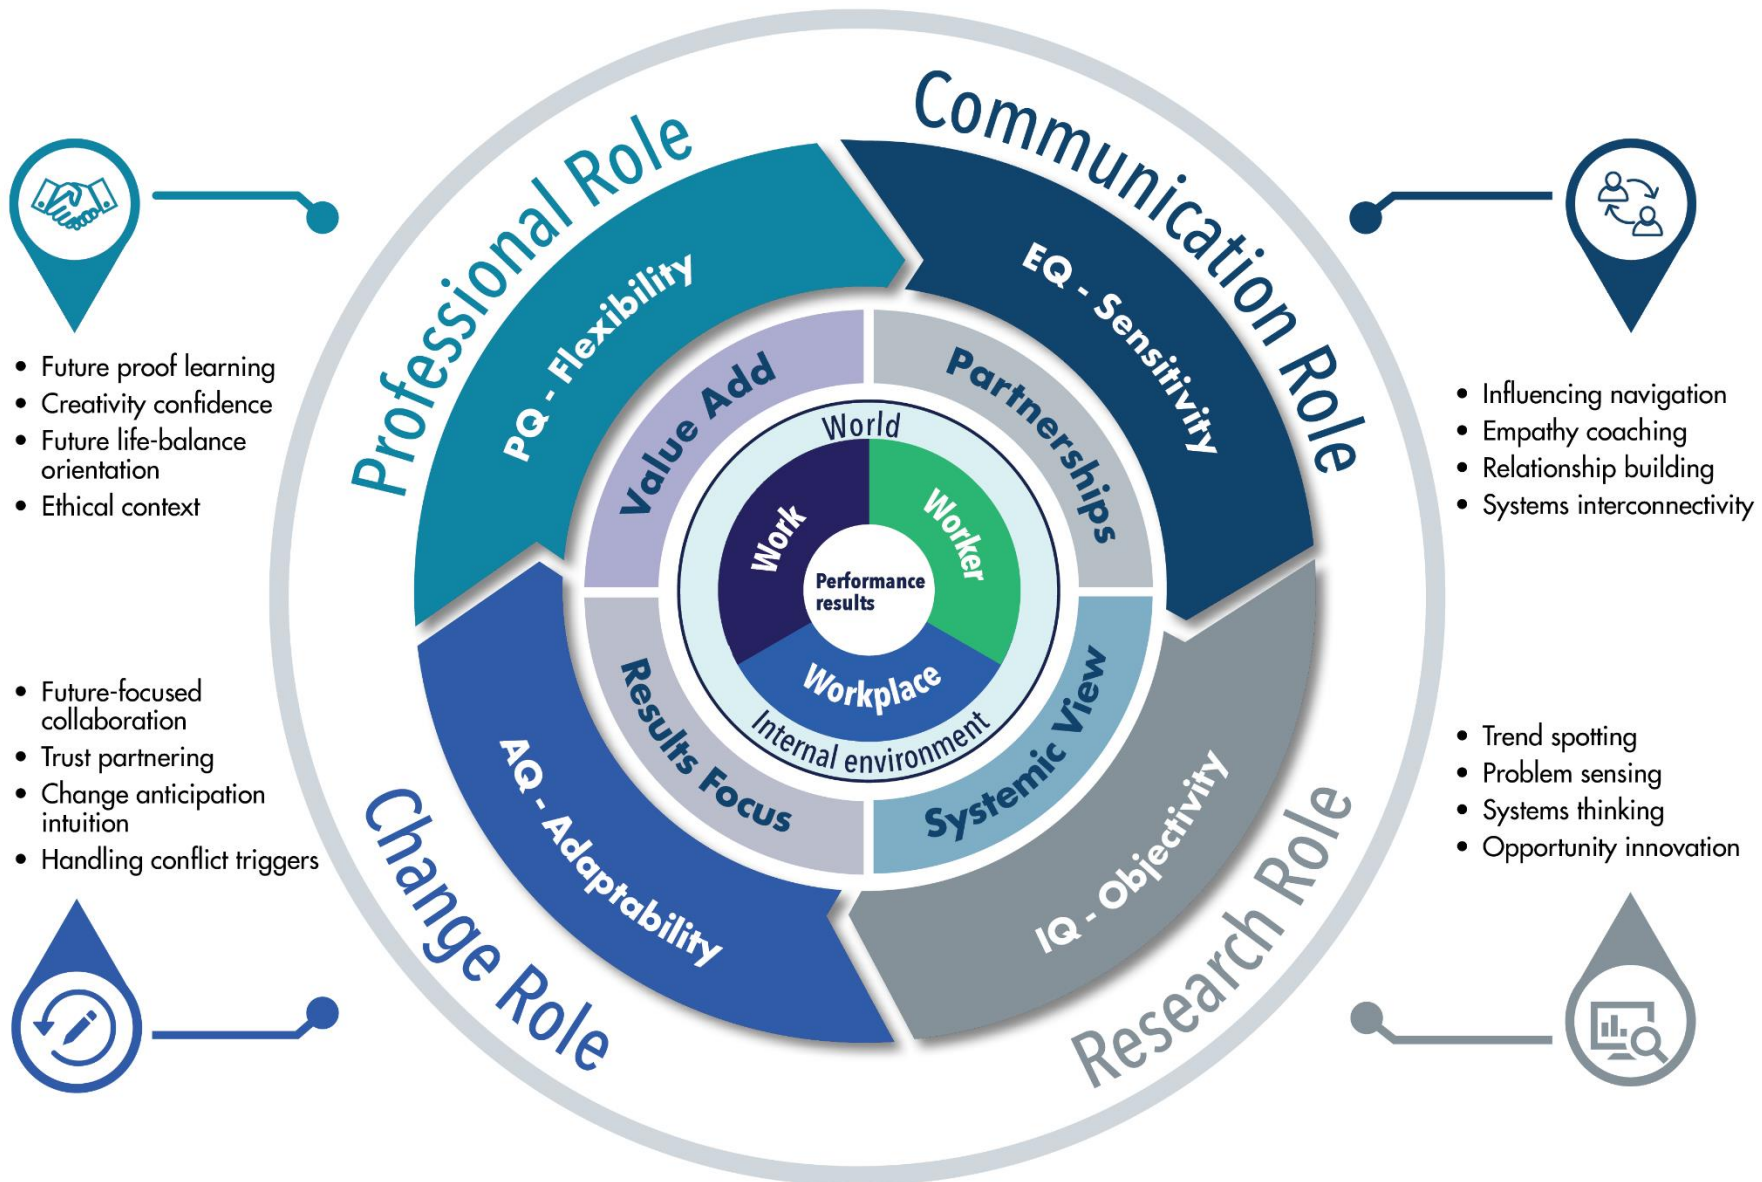

|  | Performance Planned | Performance Managed | Performance Measured | Impact, service delivery and sustainability | OUTPUT |
|---|---|--|-------------------------|---|--------|
|  Strategic Organisational System (WORKPLACE) | Culture focused values | Strategic performance mindset shifting | Engaged employees | | |
|  Tactical Operational System (WORK) | Ethical practices | HR technology and digital savvy | Quality mindset | | |
|  Technical People System (WORKER) | People and talent management in Future-fit learning and 4IR world | Performance management and agile team partnering | Service delivery impact | | |

Performance Improvement Architecture

Performance Improvement Skills Set

“I don’t agree there is a trade-off between doing good and profit. In my role, I not only create is financial impact, grow the business, and add value – I create human impact. If the entire organization focused on human impact, I know that we will create the financial impact.”

Mindy Grossman – president and CEO of WW International
